

INVESTMENT PHILOSOPHY

We believe that earnings growth drives stock performance.

Small and Mid Cap markets can be very inefficient and often contain the fastest growing stocks. Market participants can be burdened with behavioral biases (human nature) that influence their decision making and can cause them to make consistently bad decisions. Investors who can overcome these biases can potentially outperform. Paramount to our success is the disciplined execution of an investment process that is well-defined, represents sound investment principles, has both objective and subjective components and is repeatable. Our mandate is to stay fully invested and style pure.

There are additional risks associated with investments in smaller and/or newer companies because their shares tend to be less liquid than securities of larger companies. Further, shares of small and new companies are generally more sensitive to purchase and sales transactions involving the company's stock and to changes in the company's financial condition or prospects, and, therefore, the prices of such stocks may be more volatile than those of larger company stocks. Clients' investment results and principal value will fluctuate.

The investment objectives, risks, charges and expenses should be carefully considered before investing. SIMG nor their representatives provide legal or tax advice. Please consult your tax advisor before making any decisions.
